Current (08/03/21)	5	4	20	
Target (31/03/22)	5	2	10	

Operational Risks		
ID	Score	Summary risk description
103063	20	HH - Because of the potential of the main building structure un-surveyed RAAC failure, risk of harm to persons & service int'n.
102911	16	Heating system beyond economic life and prone to failure
103148	16	HH: Because of inadequate compartmentation there is a risk of harm and extended loss of services
102223	20	Risk of failure/non-compliance with air handling units to theatres and radiology
102278	15	Hinchingsbrooke: Risk of infection and resultant harm to patients, visitor or staff due to pathogenic contamination of water system
103310	15	Inadequate ventilation resulting in potential harm to staff patients or visitors
103226	20	Inability to provide oxygen due to a single points of failure could result in compromised patient safety

Key controls
<p><i>What are we already doing to manage the risk?</i></p> <ul style="list-style-type: none"> ● Estates Strategy addendum approved by Trust Board ● 6 Facet Survey - completed ● Infrastructure deep dive commissioned in support of the 6 facet survey - completed ● 2021/22 year funded backlog maintenance plan - funded ● Whole hospital replacement plans submitted to NHSI/E ● P22 partner and other framework contractors in place to project manage both backlog and C.I.R projects ● Site evacuation plans and BCPs refreshed and tested. This is supported by system planning exercises as part of the NHS England Incident Co-ordination & Recovery Workstream. Scope for the Hospital Evacuation Service Transition & Recovery Plan being consulted upon on a regional/national basis prior to adoption, with a joint response being made by the Trust and the CCG. ● Year 1 WSP survey of RAAC planks completed and report issued to the Trust Board. Year 2 surveys commenced. ● Development control plans approved by Trust Board ● Medical gases resilience works to start before July 2021 ● Water filters on all water outlets in HH site to make site safe. 3 phase plan started with phase 2 completed. ● Detailed ventilation surveys and risk assessment completed with action plans to resolve these issues. CO2 Monitors deployed and monitored to areas of concern ● External company brought in to manage backlog maintenance programme.

Assurances on controls
<p><i>How do we gain assurance that the controls are working?</i></p> <ul style="list-style-type: none"> ● Trust Board Review RAAC Panel on monthly basis ● Facilities Assurance Committee on Monthly basis ● Health and Safety and escalation via H&S Committee ● Capital Programme - Investment Committee ● Governance via operational board sub committees - Performance and estates Committee ● Non-Executive involvement in redevelopment project board ● Water AE review and overseeing work programme ● ERIC return and PAM submitted to NHSE/I ● New AE's appointed to fill gaps identified in the PAM report ● Risk register and BAF reviewed by Performance and Estates Committee on a monthly basis ● HH Development monitored via Strategy and Transformation Committee every other month.

Gaps in control	Gaps in assurance
<ul style="list-style-type: none"> Limited capital to address all backlog maintenance issues Limited revenue to manage all the risks Insufficient senior and experienced trade staffing levels to manage risks Potential financial risk related to project cost overruns and delays To pay a market rate for qualified and experienced staff we need to significantly improve what we offer 	Need to address vacancies over next 4 months.

Actions to address gaps in controls and assurance	Due date
<ul style="list-style-type: none"> Concerns regarding staff workload and stress levels are escalated to Performance and Estates Committee. Oxygen risk assessment to be reviewed following the installation of the new ring main. All Funding gaps to be addressed via investment appraisal process Vacancies to be filled with qualified and experienced staff to be paid at market rates New structure to be presented to COO for approval 	<ul style="list-style-type: none"> Monthly to PEC January 2022 continual process March 2022 December 2021

Target (31/03/24)	5	1	5	

Operational Risks		
ID	Score	Summary risk description
103423	<i>pending</i>	Unified ICT Strategy & Business Engagement
103424	<i>pending</i>	End-of-Life/End of Support infrastructure
103425	<i>pending</i>	Lack of resilience
103426	<i>pending</i>	Insufficient security management framework
103427	<i>pending</i>	Use of design best practice for infrastructure
103428	<i>pending</i>	Capacity in the team and overall resource envelope
103429	<i>pending</i>	Management of the infrastructure - people, process, technology
103262	<i>review</i>	Backup infrastructure needs to be replaced £450k 22/23

Key controls
<i>What are we already doing to manage the risk?</i>
Capital plans delivered through IT Projects to upgrade end-of-life equipment
Resilient network cores to provide failover capability between data centres in the event of a catastrophic failure of the single biggest infrastructure item the network core
Each department and ward have a Business Continuity Plan ready to invoke in the event of a prolonged IT failure, to ensure safe and effective care can continue for a time
An externally validated HiMMS INFRAM assessment has been conducted which baselines the infrastructure maturity at Level 2

Assurances on controls
<i>How do we gain assurance that the controls are working?</i>
The project RAG status used by the ICS has been adopted, monthly reporting is overseen by Committees
INFRAM assessment provides good assurance against data centre
Business Continuity plans are tested when they are invoked, progress is overseen by Emergency Preparedness Committee
Over time the levels of investment and rate of progress need to be evaluated against the Trust aspiration via the refreshed Digital Strategy in Q3

Gaps in control	Gaps in assurance
The 20/21 capital programme is part way through leaving some older UPS components, wireless and networking infrastructure at higher risk	Departmental risks to be scored
The collaboration (INFRAM) relating to voice and data infrastructure at PCH is higher risk	

Actions to address gaps in controls and assurance	Due date
INFRAM report provides clear next steps to address the risks. The resourcing and funding implications are being assessed against the required speed of progress	20/10/2021

103249	4	Risk to delivering the required transformation at pace due to current key midwifery leadership gaps

Key controls
<p><i>What are we already doing to manage the risk?</i></p> <ul style="list-style-type: none"> ● NHS Improvement Director nominated for NWAFT with monthly contact ● Bi annual quality visits ● Improvement plan in place ● Commission of an external OD team to assist with cultural improvement ● Standalone Maternity Division with new leadership and strengthened by appointment of DOM ● Maternity dashboard ● Governance review undertaken ● Recovery plans are in place Working group progressing the ten safety actions outlined in the Maternity Incentive Scheme (CNST) ● Assessment and Assurance tool outlining compliance with the 12 clinical priorities following the publication of the Ockenden report completed ● Recruitment trajectory and plan

Assurances on controls
<p><i>How do we gain assurance that the controls are working?</i></p> <ul style="list-style-type: none"> ● Revised monthly maternity dashboard ● Safety Highlight report ● Monitoring complaints ● Quarterly meetings with HSIB ● Weekly review of DATIX and WRR for grade 3 and above ● Birth-rate Plus APP to monitor staffing ● Guidelines in place ● Revised audit programme ● Progressing improvement of risk register ● Monthly risk presentation ● Quality Improvement maternity Board ● Board reporting and Director for Midwifery attends public board ● LMNS oversight ● Workforce meeting ● Uploading of Ockenden evidence through national portal ● Sign off for CNST evidence submission including CNST and Ockenden (Compliance by 15 July (Board)) - Approved ● Safety Champion Walkabouts ● FTSU Guardian feedback

Gaps in control	Gaps in assurance
<ul style="list-style-type: none"> ● Lack of capacity in senior leadership team to drive implementation of the national maternity strategy ● Vacancies and increase in turnover 	<ul style="list-style-type: none"> ● Process for learning lessons needs to be more robust which is being addressed through new ways such as videos, Facebook etc.

Actions to address gaps in controls and assurance	Due date
<ul style="list-style-type: none"> ● Recruitment task and finish group in place progressing recruitment plan. Progress reported to the Trust Board and LMNS for oversight ● Additional funding secured from Ockenden bid ● Recruitment trajectory in place OD work in development for clinically facing staff	<ul style="list-style-type: none"> ● Within scope of the governance review and following action plan

Risk score	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22	Feb-22	Mar-22
	16	16	12↓	16↑	16	16	16	16	16			

Datix Risk ID	103353	This is a risk the Trust is unable to achieve financial balance as a consequence of increased resource requirements to meet service pressures and the national financial architecture
----------------------	--------	--

Current risk rating: 15

Strategic objective	Delivering financial sustainability
Last review date	04 January 2022

Lead Executive	Chief Finance Officer
Committees	Divisional Performance Meetings, HMC, F&D

Risk rating	Consequence	Likelihood	Total	Change since last
Initial (12/10/20)	5	3	15	
Current (08/03/21)	5	3	15	
Target (31/03/22)	5	2	10	

Operational Risks		
ID	Score	Summary risk description
103391	9	Non delivery of the financial plan leading to a shortage of cash and regulatory pressure
103392	9	Non delivery of cost improvement plan leading to a baseline run rate which is too high into 2022/23
103395	9	Reduced future capital funding due to underspend against the current capital plan

Key controls <i>What are we already doing to manage the risk?</i>
<ul style="list-style-type: none"> ● Promotion of empowerment underpinned by accountability principles executed through the Accountability Framework ● Reintroduced the investment cycle ● Strengthen approvals for PFI variations ● Revisions to the ERCB process – pay controls ● Tightening of approvals for above agency cap expenditure ● Enhanced financial management support to Divisions ● Cost Improvement Programme embedded working alongside local teams ● Proactive engagement with key stakeholders and STP partners and Regulator

Assurances on controls <i>How do we gain assurance that the controls are working?</i>
<ul style="list-style-type: none"> - Monitoring of financial performance on a month basis at divisional and Trust level through internal governance arrangements - Dedicated CIP PMO and Reporting arrangements - Escalation meetings where performance deteriorates via performance metrics - Internal Audit provide annual review of key financial systems and other processes with resource implications as directed by management, i.e. Pharmacy Drug Expenditure

Gaps in control	Gaps in assurance
None identified	<ul style="list-style-type: none"> ● National framework continues to evolve in response to the pandemic

Actions to address gaps in controls and assurance	Due date
<ul style="list-style-type: none"> ● The Trust continues to work as an active member of the ICS to develop a longer term sustainable financial plan. The 2021/22 plan is the first measure of that programme. 	<ul style="list-style-type: none"> ● 31/05/21

Risk score	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22	Feb-22	Mar-22
	15	15	15	15	15	15	15	15	15			

Datix Risk ID	103438	Risk that if we do not treat our data and information as critical assets we may fail to make good use of them to run the Trust, and fail to ensure adequate cybersecurity resilience.
----------------------	--------	--

Current risk rating:
15

Strategic objective	Improving and developing our services and infrastructure
Last review date	04 January 2022

Lead Executive	Senior Information Risk Owner reporting via Chief Finance Officer
Committees	IMO/DSG/HMC/F&D

Risk rating	Consequence	Likelihood	Total	Change since last
Initial (12/09/21)	5	3	15	none
Current (12/09/21)	5	3	15	
Target (31/03/22)	3	3	9	

Operational Risks		
ID	Score	Summary risk description
103414	<i>pending</i>	Constrained Cybersecurity strategy
103415	<i>pending</i>	Risk of non-compliance against our Data Security Protection Toolkit measures
103416	<i>pending</i>	NHS Digital cyber measures need complimenting with Trust security framework
103419	<i>pending</i>	Windows servers limited telemetry visibility
103272	<i>review</i>	Windows SQL license upgrade to supported versions
103420	<i>pending</i>	Cyber security defences are present and will benefit from greater depth

Key controls
<i>What are we already doing to manage the risk?</i>
To counter the skillset risk we have established a dedicated Cybersecurity team to monitor and respond to Cyber threats We subscribe to the NHS Digital CareCERT cyber alerts and action these Cyber security training is carried out for all staff and there is a target for 95% IG training Circa one third of the DSPT relates to cybersecurity Medical Records team is established to curate paper and digital patient records Training needs analysis (TNA) has been carried out for the key staff 20/21 project to establish a Business Information capability

Assurances on controls
<i>How do we gain assurance that the controls are working?</i>
Reporting of Cyber Threats and CareCERT Management KPI monthly via IMO Committee Board SIRO report assured by Board after Board cybersecurity workshop If we do not meet the IG Training requirement 95% target we are not supporting a strong security culture in our people, we need to review the human factor e.g. social engineering CMAD proposal will independently verify the TNA especially around GDPR, DPA 2018, FOI Act 2000 INFRAM review is Level 2 for security with gaps understood and known

Gaps in control	Gaps in assurance
Need to establish a Trust Security Strategy by understanding the threat, deciding what matters, taking action Age of backup and storage system is a risk to recovery from backup - not in plan due to affordability Physical and environmental security risk will require controls and testing We have no named Information Asset Owners	Assurance required on plan once here Penetration test complete but physical / social engineering test recommended

Actions to address gaps in controls and assurance	Due date
Run an organisational cyber security maturity assessment (CMAD) Based on INFRAM improve Cyber capability and Defence in depth maturity with baseline software tools for IoT, PAM, VMS and automated Penetration testing. Establish IAO leadership at top level	Proposal received - TBC Timescales - TBC based on INFRAM
