HINCHINGBROOKE AUDIOLOGY
PATIENT INFORMATION LEAFLET

ABOUT CONNECTLINE

The Phonak ComPilot is a Bluetooth streaming device that allows you to stream telephone conversations, music or TV through your hearing aids for improved listening.

With Built-in Bluetooth wireless technology, the ComPilot offers easy access to:

- * Music and Audio
- * Computer Communication
- * Mobile Phones
- * Car Hands Free
- * Teletext
- * TV
- * Remote Microphone

We hope your new streamer reaches you in perfect condition.

RETURNS

However if any of your items become damaged or faulty, please return them to the Audiology Department so we can arrange any repairs directly with the manufacturer.

All Streamers and accessories come with a 1 year guarantee. However, this does not include accidental damage or misuse. Therefore, there will be a charge of £42.00 per repair. This is to be paid for by the purchaser.

UNWANTED ITEMS

Unfortunately we are unable to refund any unwanted ComPilots as it affects the items warranty. Therefore, before purchasing a new device, please be very sure the equipment meets your specific requirements.

Please note: The ComPilot is only compatible with Phonak hearing aids. Whilst we will do our best to ensure that you remain fitted with hearing aids that are compatible with this device, we cannot guarantee this as occasionally we may need to change or upgrade your hearing aids to a non-compatible model.

If you have any questions, please do not hesitate to contact Hinchbrook Audiology for more details.
